PROFESSIONAL SUMMARY

Final-year AI and Data Science engineer with experience in Data Analytics, Business Intelligence, Machine Learning, and Cloud Computing. Built end-to-end analytics solutions using Python, SQL, Excel, and Power BI, including a Vendor Performance Dashboard analyzing \$441M+ in sales. Published researcher (IJRASET) with 4 internships at Infosys Springboard, Microsoft Azure, and others. Proficient in Python, SQL, Power BI, Machine Learning, Azure, and AWS.

TECHNICAL SKILLS

Data Analytics: Power BI, SQL, Pandas, NumPy, Matplotlib, Excel, Data Visualization
AI and Machine Learning: Machine Learning, Deep Learning, NLP
Programming: Python, SQL, JavaScript **Frameworks:** Scikit-learn, OpenCV, YOLOv8
Cloud and Tools: Docker, Git, GitHub, REST APIs, MySQL, MongoDB

INTERNSHIP EXPERIENCE

- Infosys Springboard** November 2025 – January 2026
Artificial Intelligence Intern – Customer Support Conversation Audit Remote
– Designed LLM-based prompt evaluation system for automated conversation audit, improving sentiment detection accuracy by 35 percent over rule-based baselines.
– Built NLP pipelines for intent classification and quality scoring across 10,000+ interactions; automated batch reporting, reducing manual review time by 40 percent.
- Edunet Foundation** May 2025 – June 2025
Microsoft Azure AI Intern Remote
– Deployed 2 machine learning models on Azure using scalable cloud pipelines and Cognitive Services; reduced redeployment time by 30 percent via automated versioning workflows.
- Eduexpose.in** June 2025 – July 2025
Artificial Intelligence and Machine Learning Intern Remote
– Built real-time object detection system using Python, OpenCV, and YOLOv8 achieving 89 percent accuracy; reduced inference latency from 180ms to 75ms through pipeline optimization.
- Blackbucks / IIODT** August 2024 – September 2024
Full Stack Developer Intern Remote
– Developed weather prediction web application with REST APIs and machine learning backend; integrated MySQL database supporting 500+ concurrent transactions with 20 percent faster load time.

PROJECTS

- Vendor Performance Dashboard** | Python, SQL, Power BI, Excel | 2026
– End-to-end Business Intelligence dashboard analyzing \$441.41M in sales and \$307.34M in purchases; delivered KPIs including Gross Profit, Profit Margin, Stock Turnover, and Unsold Capital via interactive Power BI visualizations.
- AI Call Auditor – Customer Support Audit** | Python, NLP, LLMs, Prompt Engineering | 2026
– LLM-based quality audit system analyzing 10,000+ customer interactions for sentiment, intent classification, and quality scoring; cut manual audit effort by 40 percent.
- Smart Restaurant Management System Using QR Code** | Full Stack, REST API | IJRASET March 2026
– QR-based contactless ordering system with real-time tracking and admin dashboard; published in IJRASET Vol. 14, Issue III (DOI: 10.22214/IJRASET78015).
- Real-Time Object Detection System** | Python, OpenCV, YOLOv8 | 2025
– Computer vision application achieving 89 percent detection accuracy on live video with inference latency reduced from 180ms to 75ms via model fine-tuning.

EDUCATION

- BVC Engineering College (BVCEC), JNTUK** July 2022 – April 2026
Bachelor of Technology – Artificial Intelligence and Data Science | CGPA: 7.42
– Relevant Coursework: Machine Learning, Deep Learning, Natural Language Processing, Database Management Systems, Cloud Computing, Data Structures

PUBLICATIONS AND CERTIFICATIONS

- Publication:** Smart Restaurant Management System Using QR Code – IJRASET Vol. 14, Issue III, March 2026 (DOI: 10.22214/IJRASET78015)
- Certifications:** Infosys Springboard AI (2026) · Microsoft Azure AI Fundamentals (2025) · Oracle GenAI Professional (2025) · AWS Cloud – APSSDC (2025) · ServiceNow CSA (2025) · Deloitte: Data Analytics Job Simulation (2025)
